Dimock Daily Report

Date: February 15, 2012

FIELD ACTIVITY

Well Sampling

One residence sampled this morning. This will be the last sampling event until March.

Sampling operations will be suspended while the analytical data is being received, reviewed and collated.

Three residences are currently scheduled to be sampled in March (3/5/12 and 3/6/12).

There are currently five homes that we are still attempting to schedule. Of these five, one will not be back in the area before April.

An additional well survey is scheduled for tomorrow 2/16/12. The resident contacted EPA regarding possible sampling and indicated that Cabot had conducted well sampling in the past. The resident is located between two homes that EPA has already sampled.

As of noon today: Region 3's START contractor has 11 personnel on-site. Assuming all samples are shipped today, all START personnel will demobilize by the end of the day. Two SERAS (ERT contractor) personnel will remain on-site for the remainder of the week to continue with data management. Three Region 3 ERRS contractor personnel will also remain on-site.

Alternate water delivery will continue.

As of noon:
